5. SCOPE OF WORK AND SPECIFICATIONS

5.1 Background:

SCOPE OF WORK:

Ridge Area Arc, Inc. proposes to provide protection against wind and power outages to five residential structures housing individuals with intellectual and developmental disabilities. The properties are located within Avon Park and Sebring, Florida, zip codes 33825 and 33870. The project proposes to comprehensively protect the exterior envelope of the buildings by protecting all building openings with high impact resistance products. Two properties (Pleasant and Queen Palm) shall also protect the roof by installing new metal roofs in compliance with Florida Building Code. The roofs of the remaining three (3) homes (Lotela, Cornell, and Sunset) were replaced in 2022, 2018, and 2018, respectively, and already meet the existing code requirements. The project also includes the installation of four (4) permanent generators with a capacity of 24 kW or 30 kW, or the adequate size determined by the vendor or an electrical engineer during the bid process, along with concrete pads, automatic transfer switches (ATS), necessary wiring, and the installation of 500-gallon propane underground tanks. The following are the properties to retrofit:

ID#	Name/Station	Location (address)	Mitigation Actions
1	<i>Pleasant Home</i>	110 West Pleasant Street, Avon Park, Florida 33825	Opening protection, roof, generator
2	<i>Lotela Home</i>	18 North Lotela Avenue, Avon Park, Florida 33825	Opening protection, generator
3	<i>Cornell Home</i>	1201 State Road 17 South, Avon Park, Florida 33825	Opening protection, generator
4	<i>Sunset Home</i>	1407 Sunset Drive, Sebring, Florida 33870	Opening protection
5	<i>Queen Palm Home</i>	1502 Queen Palm Avenue, Sebring, Florida 33870	Opening protection, roof, generator

The five (5) residential structures are currently vulnerable to high wind events and have a history of power outages post-storms, negating the ability of the facilities to maintain operations and protect food, medication, and other resources. This project will allow for the continued operations of these facilities following severe weather events. Wind protection activities must follow the recommendations from a Hurricane Retrofit Building Assessment conducted by a professional engineer or licensed architect, utilizing the methodology provided in Chapter 3 of FEMA P-804 to determine whether a structure is a good candidate for a wind retrofit and identify the retrofits to be performed on the structure. (Pursuant to subsection 553.896(2), Florida Statutes, projects including the construction of new or retrofitted window or door coverings must conform to design drawings that are signed, sealed, and inspected by a structural engineer who is registered in this state.) Wind protection shall be provided on any other opening such as vents, louvers, and exhaust fans. The project shall conform with design criteria found in ASCE 7 standards. All installations shall be in strict compliance with the Florida Building Code or Miami Dade Specifications. All materials shall be certified to meet wind and impact standards. The local municipal or county building department shall inspect and certify installation according to the manufacturer's specifications. The Project shall provide protection against 140 MPH winds for Risk Category II buildings and structures, or the wind speed protection and impact requirements indicated by the effective Florida Building Code at the time permits are issued.

Wind protection activities supporting a critical action shall also be protected to a height at or above the 500-year (0.2% annual chance) flood elevation. The generators, ATS, and electrical components shall be protected against a 500-year (0.2% annual chance) flood event, in accordance with 44 CFR 9.11, by implementing specific activities or by locating the generators and ATS outside the Special Flood Hazard Area (SFHA), comply with applicable National Flood Insurance Program (NFIP) requirements, and shall be protected against wind with a rated enclosure and appropriate anchoring based on its location requirements per ASCE 7 standards. The selected site shall provide sufficient space to maintain and fuel the generators and shall comply with the National Electrical Code working clearance requirements. Activities shall be completed in strict compliance with Federal, State, and Local applicable Rules and Regulations.

PRICE ADJUSTMENT CLAUSE

STATEMENT OF ISSUE: The commodity(s) or services represented in the attached Invitation to Bid may be considered volatile price item(s) which may show drastic swings in price and availability during the contract period. In consideration, the AGENCY is including this price adjustment clause in the solicitation to encourage adequate competition and fair pricing on the (estimated) indefinite quantity requirement and to discourage padding or hedging prices.

The AGENCY's price adjustment criteria are as follows:

VENDOR shall agree that submitted pricing **will be held firm for the first year of contract term**. Pricing will be reviewed at the anniversary date thereafter. A price escalation or reduction may be requested by the VENDOR or the AGENCY, to the price of all items. The AGENCY may, in its sole discretion, accept an equitable adjustment in the Contract terms or pricing if pricing or availability of supply is affected by extreme and unforeseen volatility in the marketplace, that is, by circumstances that satisfy all the following criteria: (1) the volatility is due to causes wholly beyond the VENDOR's control, (2) the volatility affects the marketplace or industry, not just the particular Contract source of supply, (3) the effect on pricing or availability of supply is substantial, (4) the volatility so affects the VENDOR that continued performance of the Contract would result in a substantial loss and (5) No price adjustment will be approved to compensate a vendor for inefficiency or for errors or omissions in judgment or for additional profit.

Requests from the VENDOR for price adjustments shall be RECEIVED IN WRITING (via email or mail) and are subject to AGENCY Board approval (if applicable) and executed contract amendment before becoming effective. Failure to reach agreement for a price adjustment may, at the sole option of the AGENCY, result in the termination of the Agreement for cause.

Official VERIFIABLE documentation of such changes **SHALL** be provided with the request for price adjustment in order to substantiate any requested change. The AGENCY reserves the right to consider various pertinent information sources to evaluate price increase requests (such as the CPI and PPI, US CITY Average, as published by the US Department of Labor, Bureau of Labor Statistics). The AGENCY also reserves the right to consider other information related to special economic and/or industry circumstances, when evaluating a price change request. Changes may be either increases or decreases and may be requested by either party.

As an authorized representative of the company listed below I fully understand, accept and agree to abide by the procedures denoted in this price adjustment clause.

The Act provides that the CONTRACTOR and AGENCY is prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The AGENCY must report all suspected or reported violations to the appropriate Federal agency.

8. *CONTRACTOR. The CONTRACTOR shall comply with 18 U.S.C. § 874, 40 U.S. C. § 3145, and the requirements of 29 C.F.R. pt. 3 as may be applicable, which are incorporated by reference into this Contract.*
